

Dear Parents,

Please join us for the latest in our meetings regarding implementation of Information and Communication Technologies changes in the Middle School at Orange Christian School.

Thursday September 27 2018 at 7pm in the Learning Hub

The significant item to discuss is the potential to move forward the roll out of the School's 1-to-1 iPad program into Stage 4 from 2020 to 2019. This will include details of costs, value and education impacts.

This meeting follows discussions at the February parent meeting, at Discover Year 7 Information Night, the June Information Technology Meeting, responses to the 2018 Middle School Survey and informal discussion with parents.

We would like to discuss the implementation of the CANVAS Learning Management System (LMS) as a significant teaching and learning tool. See how CANVAS can be used in classrooms and for students to access work, assessment tasks and assistance from their teachers away from school. You will be able to see Canvas in action on the night.

We will also assess the roll out of the Apple.Id / email program into Stage 4 and demonstrate the use and facility of Microsoft 365 that will be phased into our School ICT program over the next few months.

If you have not been part of the previous discussions, please do not feel that you cannot be part of this meeting and join in the conversation from this point. It will be a great pleasure to greet you and we hope you can join us.

Kind regards

Adrian Lee

Middle School Coordinator
